Customer Journey Map

Map out the customer's experience stage-by-stage, capturing their actions, touchpoints, thoughts, and feelings, along with process ownership and improvement opportunities at each stage.

Phase of Journey	**Stage 1**	**Stage 2**	**Stage 3**
Actions *What does the customer do?*	• Opens the Olympic analysis dashboard. • Views the project overview. • Identifies available dashboards.	• Applies Year, Season and Sport filters. • Compares medal charts. • Explores athlete and regional insights	• Reviews the Tableau Story. • Identifies key patterns. • Reads the final conclusions.
Touchpoint *What part of the service do they interact with?*	• Tableau Public workbook. • Dashboard title and overview. • Dashboard navigation.	• Interactive charts. • Dashboard filter controls. • Athlete and regional visualizations.	• Four-point Tableau Story. • Key findings section. • Conclusion and limitations.
Customer Thought *What is the customer thinking?*	• “What does this project analyze?” • “Which dashboards are available?” • “Can I compare	• “Which countries have the highest medal counts?” • “How do medal trends change over time?”	• “What are the main findings?” • “Which patterns are most noticeable?” • “What are the

	Olympic countries?"	• "What patterns appear in athlete data?"	limitations of this analysis?"
Customer Feeling *What is the customer feeling?*	• Curious about Olympic performance. • Interested in exploring the data. • Hopeful for clear insights.	• Engaged while comparing charts. • Focused on identifying patterns. • More confident when charts are clear.	• Informed by the visual analysis. • Satisfied with the comparisons. • Aware of the findings and limitations.
Process Ownership *Who is in the lead on this?*	• Project developer. • Tableau workbook creator. • Dataset provider.	• Tableau workbook creator. • Data analyst. • Dashboard maintainer.	• Data analyst. • Project developer. • Report preparer.
Opportunities *How can we improve this stage?*	• Add a clear project introduction. • Improve dashboard navigation. • Explain the dataset sources.	• Improve filter usability. • Add clear metric definitions. • Improve chart labels and tooltips.	• Highlight verified findings. • Explain data limitations. • Add future improvements.
