Activity 1: Interactive and visually appealing dashboards

Creating an effective Streamlit dashboard involves presenting business data stored in Snowflake through clear, interactive, and easy-to-understand visualizations. Students should design the dashboard so that users can quickly understand important KPIs, trends, comparisons, and business insights.

- Clear and Intuitive Layout
- Use Appropriate Visualizations
- Colour and Theming
- Interactive Filters and Slicers
- Drill-Down Capabilities
- Responsive Design
- Custom Visuals and Icons
- Use of Infographics

Major Outcomes from the Global Olympic Sports Performance Analysis Dashboard

1. **Countries demonstrate different levels of Olympic success.**
   The *Top Countries by Total Medals* chart compares countries based on their overall medal counts, helping identify leading performers.
2. **Gold, silver, and bronze medal distributions reveal differences in performance.**
   The *Gold, Silver & Bronze Comparison* chart highlights how medal types contribute to each country's overall Olympic achievements.
3. **Olympic medal performance changes across years.**
   The *Olympic Medal Trends by Year* chart helps explore changes in medal counts over time and identify broader performance patterns.
4. **Athlete participation can be examined by gender and sport.**
   The *Athlete Gender Analysis* and *Athlete Participation by Sport* charts provide insights into the distribution of athletes across genders and sporting disciplines.
5. **Regional performance and investment categories can be compared.**
   The *Average Medal Efficiency by Region* and *Average Medal Count by Investment Category* charts help explore differences across regions and investment categories. These comparisons show associations and do not establish that investment directly causes medal success.
6. **Host-country medal performance can be investigated.**
   The *Medal Performance by Host Country* chart supports comparisons of medal performance across host-country categories.
7. **Interactive filters improve dashboard exploration.**
   Year, Season, and Sport filters allow users to explore relevant subsets of the available Olympic data.

Overall Outcome: The dashboards bring together country rankings, medal trends, athlete participation, regional comparisons, investment categories, and host-country performance in an interactive Tableau analysis. The four-point Story presents the key findings in a structured sequence.
