Dashboard Design

Date	28 October 2026
Team ID	EN25CS3010016
Project Name	Global Olympic Sports Performance Analysis
Maximum Marks	5 Marks

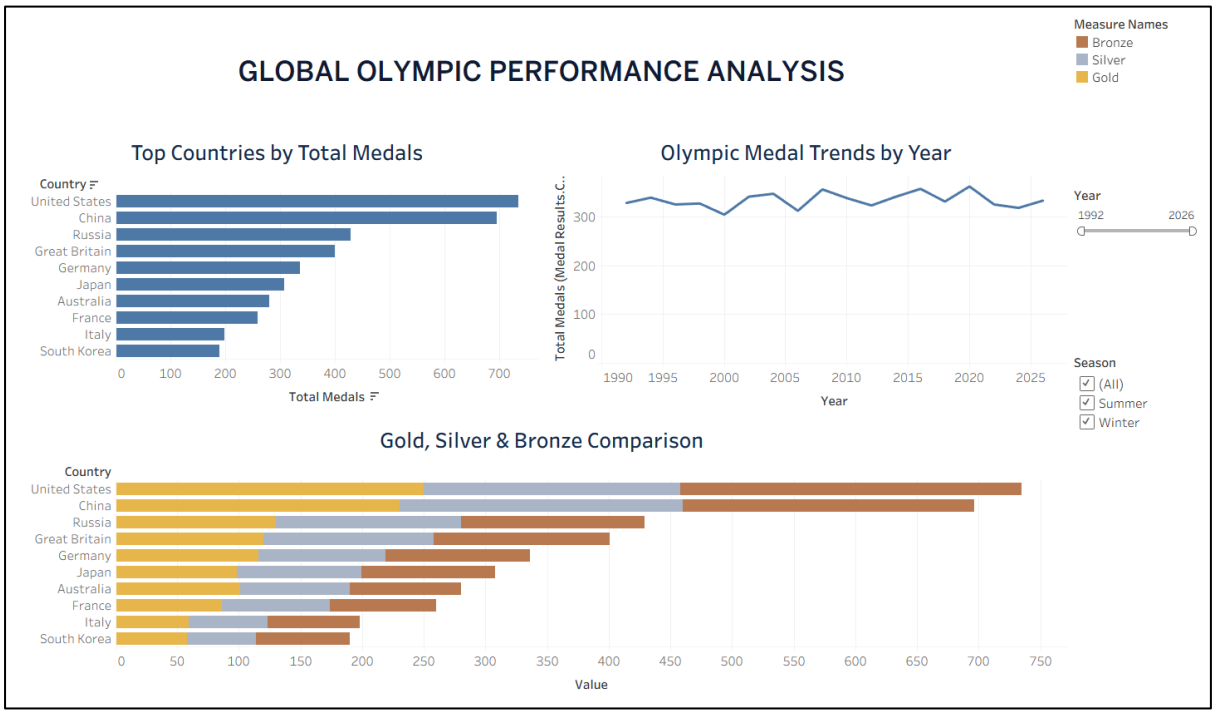

Creating an effective dashboard involves thoughtful design to ensure that the presented information is clear, relevant, and easily understandable for the intended audience. Here are some key principles and best practices for dashboard design

Activity 1: Interactive and visually appealing dashboards

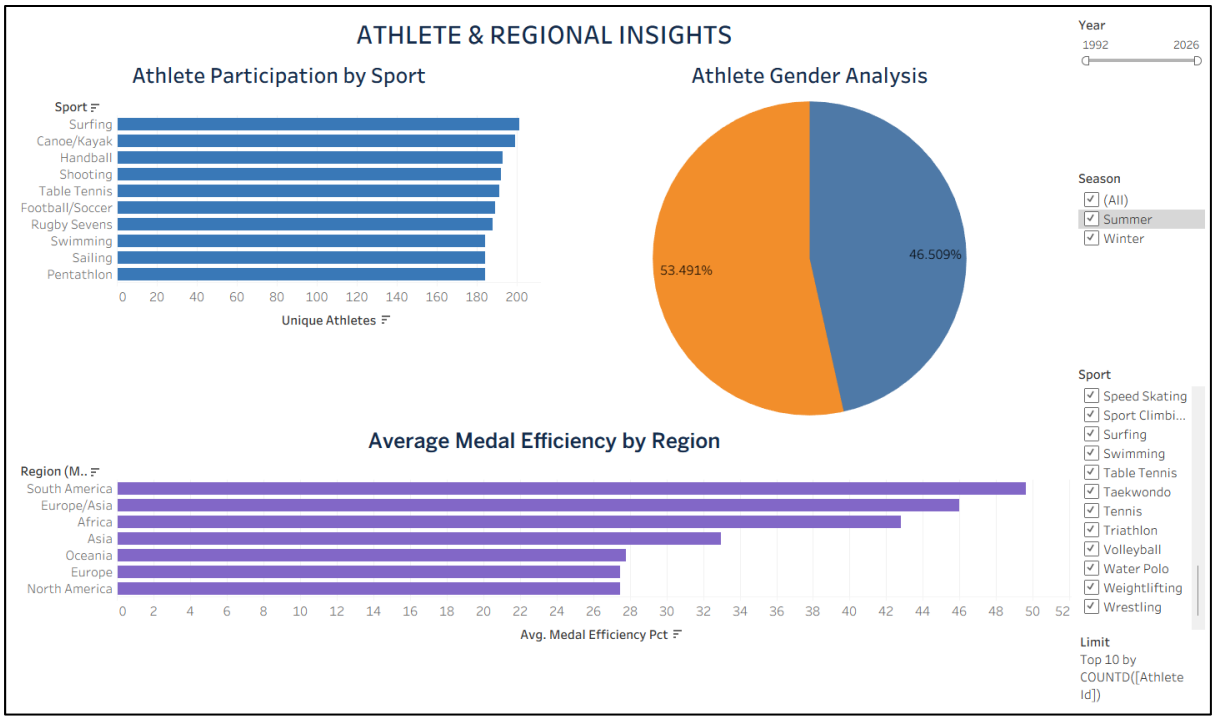

Creating interactive and visually appealing dashboards involves a combination of thoughtful design, effective use of visual elements, and the incorporation of interactive features. Here are some tips to help you design dashboards that are both visually appealing and engaging for users so take care of below points

- Clear and Intuitive Layout
- Use Appropriate Visualizations
- Colour and Theming
- Interactive Filters and Slicers
- Drill-Down Capabilities
- Responsive Design
- Custom Visuals and Icons
- Use of Infographics

Major Outcomes from the Global Olympic Sports Performance Analysis Dashboard

1. **Countries demonstrate different levels of Olympic success.**
   The *Top Countries by Total Medals* chart compares countries based on their overall medal counts, helping identify leading performers.
2. **Gold, silver, and bronze medal distributions reveal differences in performance.**
   The *Gold, Silver & Bronze Comparison* chart highlights how medal types contribute to each country's overall Olympic achievements.
3. **Olympic medal performance changes across years.**
   The *Olympic Medal Trends by Year* chart helps explore changes in medal counts over time and identify broader performance patterns.
4. **Athlete participation can be examined by gender and sport.**
   The *Athlete Gender Analysis* and *Athlete Participation by Sport* charts provide insights into the distribution of athletes across genders and sporting disciplines.
5. **Regional performance and investment categories can be compared.**
   The *Average Medal Efficiency by Region* and *Average Medal Count by Investment Category* charts help explore differences across regions and investment categories. These comparisons show associations and do not establish that investment directly causes medal success.
6. **Host-country medal performance can be investigated.**
   The *Medal Performance by Host Country* chart supports comparisons of medal performance across host-country categories.
7. **Interactive filters improve dashboard exploration.**
   Year, Season, and Sport filters allow users to explore relevant subsets of the available Olympic data.

Overall Outcome: The dashboards bring together country rankings, medal trends, athlete participation, regional comparisons, investment categories, and host-country performance in

an interactive Tableau analysis. The four-point Story presents the key findings in a structured sequence.

Activity 2

Publish Dashboard on Tableau Public:
