Story

Date	28 October 2026
Team ID	EN25CS3010016
Project Name	Global Olympic Sports Performance Analysis
Maximum Marks	5 Marks

By using stories in Tableau, you can effectively communicate complex data in a way that is both interactive and engaging, making it easier for the audience to follow along and understand the insights. It's a tool for **data storytelling**, allowing you to present insights in a cohesive, engaging way that takes viewers through a logical progression of findings or analyses.

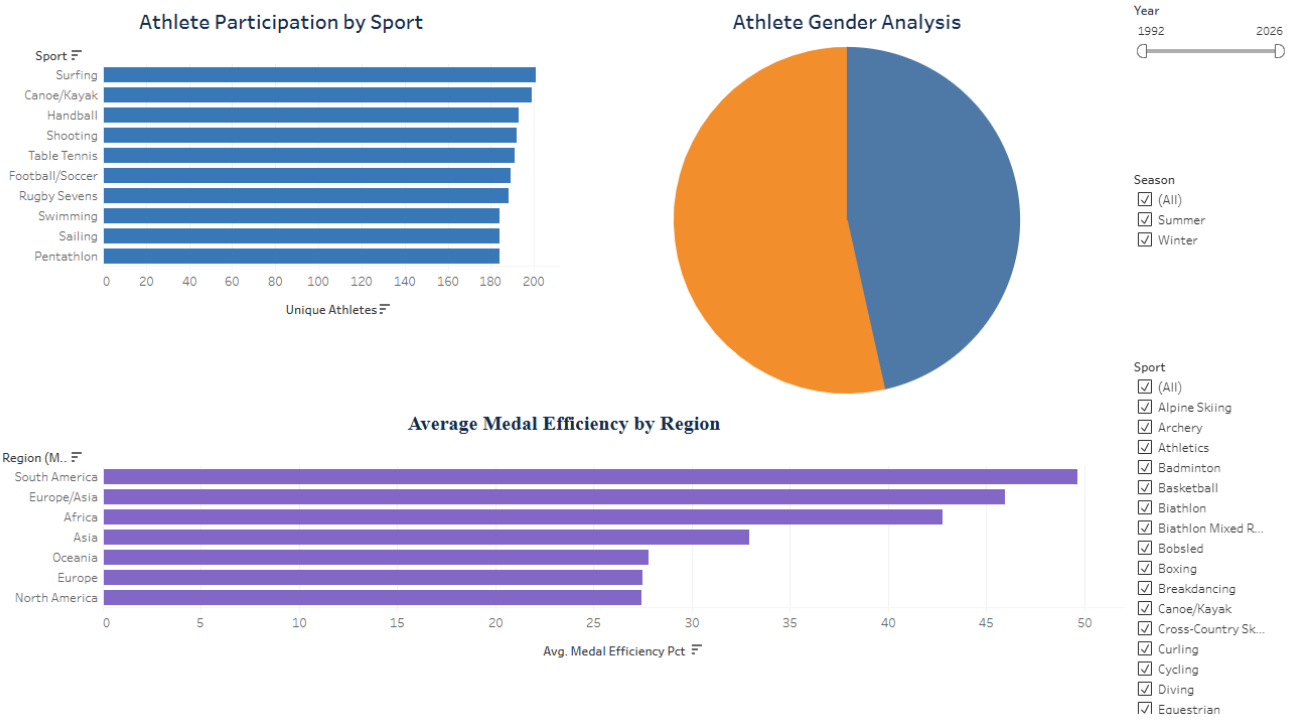

In Tableau, **Story** is a feature that allows you to create a sequence of dashboards, visualizations, and text to present data insights in a cohesive and narrative-driven way. It's like a slideshow within Tableau that guides the audience through a series of data points, helping them understand key insights, trends, or outcomes of your analysis.

Story 2:Athlete & Regional Insights

Explore athlete participation across different sports, compare gender representation, and examine how medal efficiency varies by region. These views help identify participation patterns and differences in regional performance.

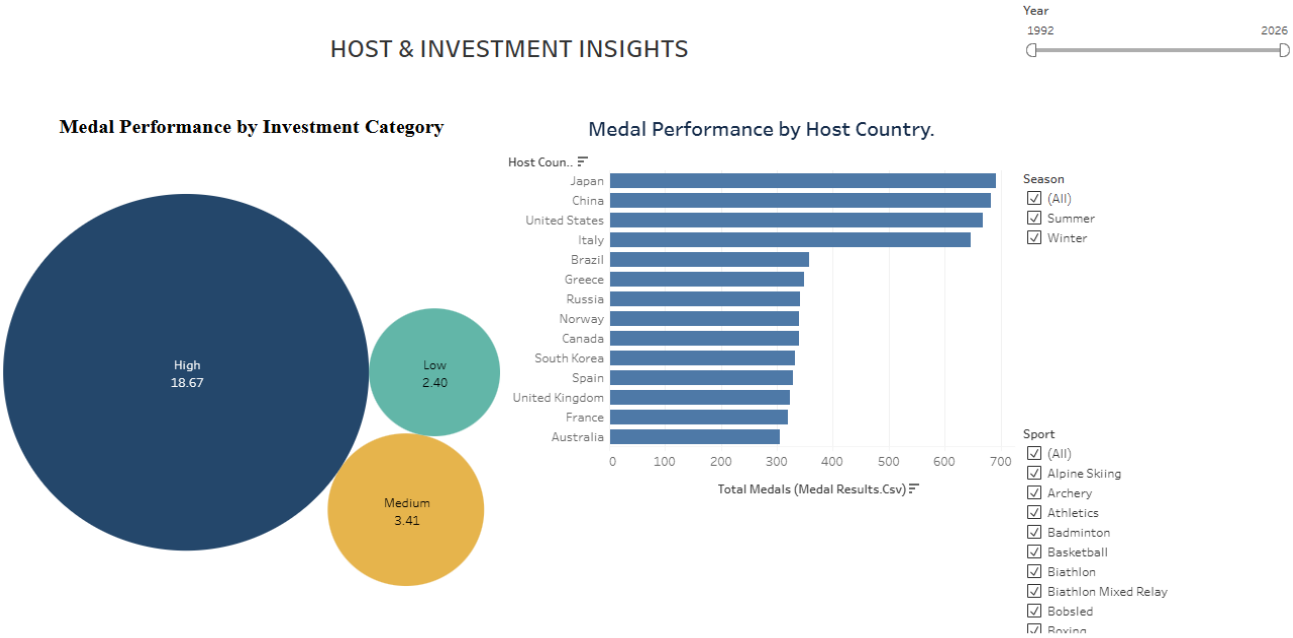

ATHLETE & REGIONAL INSIGHTS

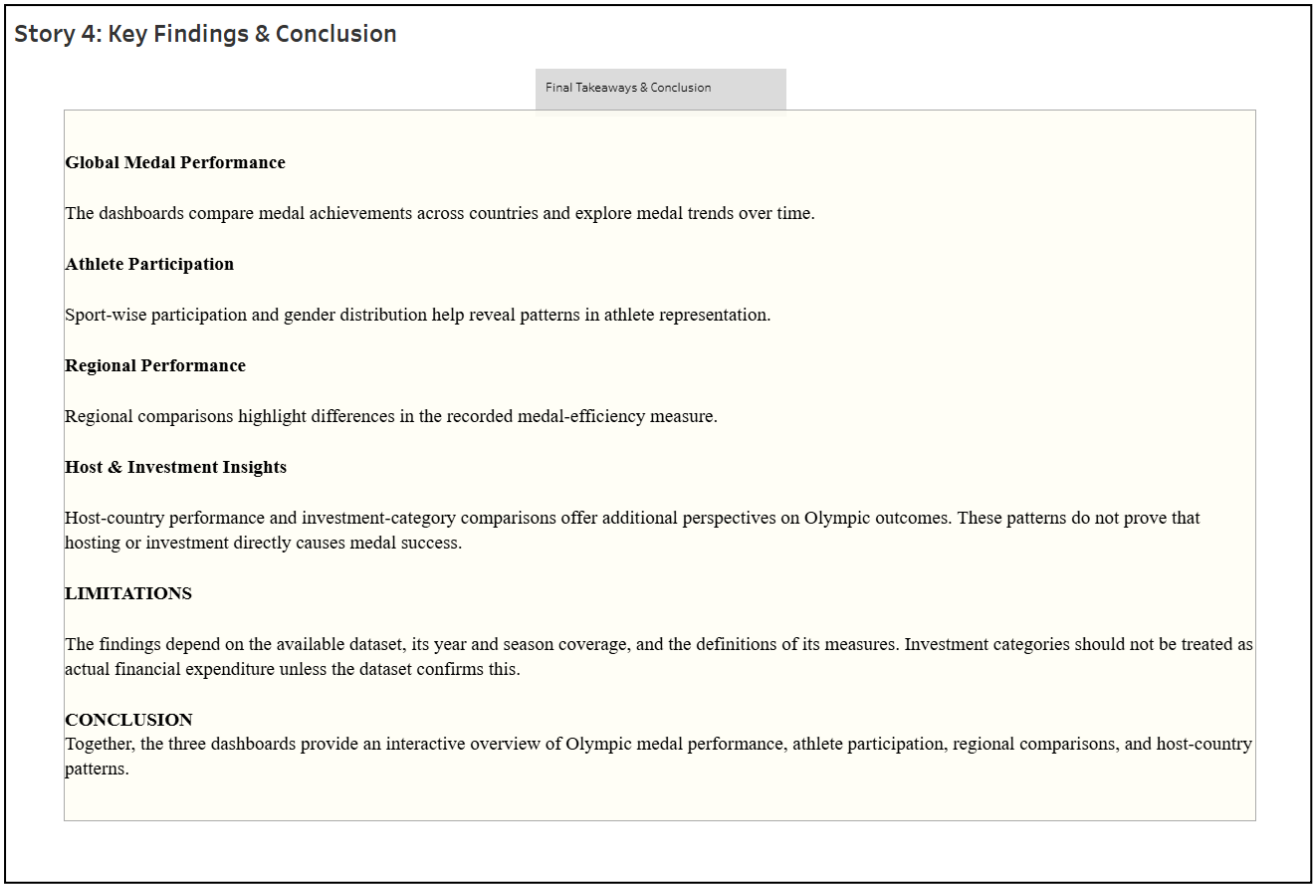

Story 3:Host Advantage & Investment Patterns

Compare medal performance across host countries and explore differences between sports investment categories. Use the available filters to investigate how results vary by year, season, and sport. Investment-category comparisons show associations in the available data and should not be interpreted as proof that investment causes medal success.

HOST & INVESTMENT INSIGHTS

Observations:

- **Country-wise Medal Performance:** The *Top Countries by Total Medals* visualization compares countries based on their overall Olympic medal counts.
- **Medal Type Comparison:** The *Gold, Silver & Bronze Comparison* chart highlights differences in medal distributions among countries.
- **Olympic Performance Trends:** The *Olympic Medal Trends by Year* chart helps examine how medal counts vary across Olympic years.
- **Athlete Participation Insights:** The gender and sport participation visualizations provide an overview of athlete representation across genders and sporting disciplines.
- **Regional and Investment Comparisons:** The regional medal efficiency and investment category visualizations help explore differences in Olympic performance across regions and investment categories.
- **Host Country Analysis:** The host-country visualization supports comparisons of medal performance across host-country categories.

Overall Outcome: The four-point Tableau Story presents the project's major findings in a structured sequence, helping users explore Olympic performance, athlete participation, and medal distribution through interactive visualizations.
